

TESTIMONIALS

“Mid Coast Group Training has provided a service that every small or large business needs. They have taken up the extra work load entailed with employing trainees and apprentices. Their role provides the employer with a suitable trainee or apprentice and arranges all the formal training required ensuring the paperwork and profiles are complete, through to the trainee or apprentice completing their course and gaining their qualification. Their service also includes monitoring the progress of the trainee or apprentice, providing safety equipment and ongoing OH&S training. Our association with MCGT is a successful and invaluable partnership together”.

Christine Thomson, Director Mid Coast Piling & Drilling Pty Ltd

“Bale Engineering has been utilising the services of Mid Coast Group Training (MCGT) since February 1995. We have found MCGT to be exemplary in the level of service they provide and always available if we have any queries in regards to apprenticeship employment issues/concern. Because of this close association, we have been able to concentrate on the hands on training of the apprentices whilst MCGT looks after all the administration & training issues. We have found them to be professional to deal with and they provide a speedy resolution to any problems that have arisen.

I would recommend them to other companies wishing to use them as a means to employ apprentices and trainees.”

Robert Bale, Bale Engineering Co Pty Ltd

“Mid Coast Group Training provide a consistent and reliable service to Better Homes, managing the employment and administration of our apprentices and trainees. "Since first meeting with Mid Coast Group Training over ten years ago the team has always strived to be extremely helpful in not only providing a great hassle free service, but have also helped to guide and encourage our apprentices in their ongoing development. The team goes above and beyond of what is expected of them.”

John Heagney, Better Homes
